

Screen shows 1st question, instruction and beginning score for both players

Questions are stored as objects in an array

Click button "True or False" to answer and function to check if selection is correct

The first player to answer 3 questions correctly wins the game. Send winner alert, play winner sound and reloads page.

If correct – play correct sound, +1 to current player score and send an alert

If incorrect – play incorrect sound and send an alert with explanation

Slice answered question out from array, switch player and get new question
